

NEW!

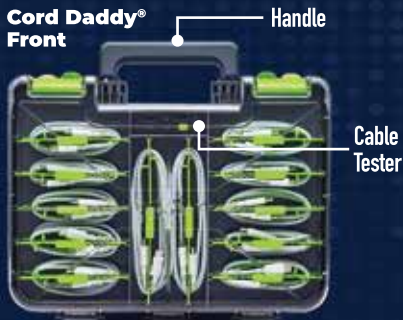

CORD DADDY®

Storage System

HOW TO USE:

WHAT'S INCLUDED:

- (10) Short Cord Daddy® Cards
- (20) Cord Wraps
- (2) Long Cord Daddy® Cards
- (20) Labels

Cord Daddy® Card

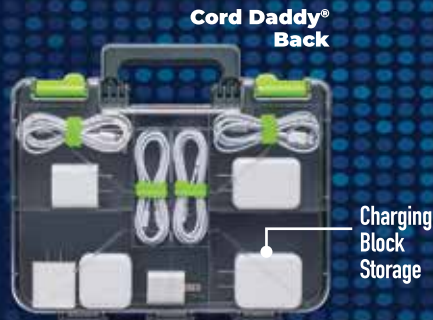

Cables & Charging Blocks Not Included.

Cords/Cables can be stored on the Cord Daddy® Cards, or in the open compartments. Charging blocks should be stored in the open compartments.

1. Remove Cord Daddy® Card from your Cord Daddy®
See Fig 1.
2. Insert one end of your cord/cable into a clip, and start wrapping around the card horizontally, until you can insert opposite end of cord/cable into another clip.
See Fig 2.
3. Replace Cord Daddy® Card back into the Cord Daddy®.
See Fig 3.
4. If desired, use the included Label to write down type of cord, and place on top of the Cord Daddy® Card.
See Fig 4.
5. If storing cords/cables in open compartments, use included Cord Wraps to keep them neat.
See Fig 5.

USING THE TESTER:

1. Remove tester from unit, and remove battery door and set aside.

2. Install 2x AAA batteries (not included) and replace door.

3. Insert one end of the cable you would like to test into the green INPUT section (USB-A or USB-C).

NOTE: One end of the cable MUST be inserted into the INPUT section for tester to properly function

4. Insert opposite end of cable into the OUTPUT section (USB-C, Micro-USB, or Lightning)

5. Press the TEST button - if light is GREEN, cable is functioning properly. If light is RED, Cord is defective.

The included Cord Tester can be used to test several different cables:

- USB-A to USB-C
- USB-C to USB-C
- USB-A to Lightning
- USB-C to Lightning
- USB-A to Micro-USB
